Sign Medicare Freedom Petition to Trump

The Clinton Administration added a requirement to the Social Security program. It mandates that individuals lose their Social Security benefits if they refuse to enroll in Medicare, Part A, the hospitalization program. And those who disenroll must pay all benefits received back to the government. This is not a law and no law authorizes these penalties. It's simply language that President Trump could delete.

Our organization wants the Trump administration to delete these unconstitutional penalties. This would give Americans the option to keep private insurance and to *not* enroll in Medicare, and it would likely kickstart a new market for private lifelong health insurance.
