Will Doctors Go the Way of the Dinosaur?

Everyone is profiting from health care except physicians. Doctor Mark Sklar says managed care uses contracts to hurt physician income. Under Obamacare, physicians are being organized into Accountable Care Organizations, which will take a high percentage of the doctor’s income.

And under Obama’s electronic health record mandate, EHR companies are harvesting money from physician practices. Physician time is also being cut. Doctors must spend 90 minutes each day in data entry for government reporting. Dr. Sklar writes, “When should I see patients?” It’s time for doctors to go cash and drop insurers, Obamacare, Medicare and Medicaid. Otherwise doctors may go the way of the dinosaur.
