Obama Diverts 500M to IRS for Obamacare

The President is quietly diverting $500 million to the IRS to hire 837 new employees. They will enforce the controversial individual mandate, and distribute $777 billion in subsidies through Obama’s exchanges – the federal takeover centers. Last week Republicans demanded information on how the IRS has used the first $200 million. No response yet.

Mr. Obama is spending taxpayer dollars on the individual mandate before the Supreme Court has determined its constitutionality. That Mr. Obama would spend our money while the legitimacy of the law is still in question shows an arrogant disregard for the judicial branch of government.
