Response to SCOTUS Ruling

Today the U.S. Supreme Court decided to create a tax where there is none, and let the unconstitutional mandate and almost 2,700 pages of the Federal Obamacare law move forward. Chief Justice John Roberts joined the liberal arm of the courts to give the President a win. Justice Alito in his dissent did not mince words. He said, “the court found a tax when congress specifically rejected a tax.” This is not the end, while congress works to repeal the law, states must refuse to install the laws controlling infrastructure. The government health insurance exchange and the law must be repealed. As Senator Jim Demint said referring to elections, “it’s now up to the people to stop it.”
