February 28, 2023

Say No to “The Digital ID Act”

The “Improving Digital Identity Act of 2022” is advancing in Congress. Its stated purpose is to promote the “development of digital versions” of driver’s licenses, Passports, social security numbers and birth certificates. For both public and private purposes. Think about that. Digital allows outside controls and tracking, and it encourages hackers.

The bill admits it could increase exploitation, privacy risks and outside access to the foundational identity documents that verify that you’re you. Thus, it will enable identity theft, and because it's a federal bill, it will enable federal control, as China has over its people. Tell the authors and your Senators to oppose S. 4528. Say no to the Digital ID Act.
