## Who Will Stop the Dangerous Pfizer Injection?

The FDA's emergency use authorization for Covid shots is dangerous. EUAs are issued during public health emergencies to allow use of unapproved drugs, not yet proven to be effective or safe. The EUA has enabled Covid-19 vaccine mandates, despite increasing evidence of vaccine injury and despite Pfizer receiving reports of more than 158,000 adverse "events" in the first 2 ½ months after emergency use authorization.

It gets worse. Under the EUA, drug companies have zero liability for vaccine injuries. But once the FDA approves a vaccine, the company becomes fully liable for all injuries. Pfizer's Covid injection called Comirnaty has been approved but Pfizer's not selling it in the U.S. Is that to escape liability for injury?
