Truth Coming Out on Masks

The CDC wants us to believe masks work, but truth is catching up with them quickly. First, in a funny Saturday Night Live skit of three couples at a restaurant, one woman mentions the Bloomberg article that says, “masks had little to no effect on Covid.” The other couples sat in horrified shock. But this means it’s now safe to question masks publicly without censorship. This shows how desperate the Left is to try to save midterm elections.

It gets better. The Daily Mail out of England has an article titled, “So, what was the point? Cloth masks allow 90% of particles to filter through, giving them little ability to prevent Covid transmission, study finds.” I’ve been telling you this for over a year. Better late than never.

“So, what was the point? Cloth masks allow 90% of particles to filter through giving them little ability to prevent COVID transmission, study finds,” Mansur Shaheen, Daily Mail, March 1, 2022: https://bit.ly/3KmmPZk

“Mask Mandates Didn’t Make Much of a Difference Anyway,” Faye Flam, Bloomberg, February 11, 2022: https://bloom.bg/3hSdFr7
