Resist the “Health Equity” Agenda

The term “health equity” is popping up everywhere. The Biden administration just requested feedback on measures to use to improve health equity in Medicare Advantage plans. The administration plans to create a “**health equity index**” to determine how the plans are combating social risk factors.

According to the CDC, health equity is achieved when every person can “attain his or her full health potential” and no one is “disadvantaged” in that achievement by social position or circumstances. Health inequities are differences in length and quality of life, rates of disease, severity of disease and access to treatment. In short, “health equity” is the Left’s new path to socialism and socialized medicine. Resist the health equity agenda.
