Should You COVID-Vax Your Babies?

The federal government wants parents to inject their youngest children with the experimental Covid shot. Nearly 20 million children could be impacted.

Parents, please think twice. Doctors are losing their jobs by opposing the vaccine, especially for children. As wise King Solomon proved in 1 Kings 3, look for the truth from the one who is willing to sacrifice the most. One medical journal cautions that there is uncertainty about the vaccine harms and reminds readers that acute Covid poses little risk for children.

One doctor says, "There was NO STATISTICAL SIGNIFICANCE in the vaccine study" that would recommend it for children. And Dr. Pierre Kory says, "the risks outweigh the benefits." Don't be bullied. Get informed. Your child's life and future depend on it.
