Let Doctors Personalize Patient Care

We were recently in Washington, D.C. to discuss our **New Framework for Health Freedom in America**. It's a free-market framework. It's a cash-based system of care at every level, including hospitals. The framework will restore affordable, catastrophic major medical indemnity insurance that pays the patient directly. The patient will then pay the hospital and doctor directly.

There will be no interference, no costly bureaucracy, no prior authorization requirements. This means patient-centered care with full-price transparency.

To help us build the framework, we asked for three pieces of legislation, including a repeal of the ban on physician-owned hospitals. This will create cost-cutting competition and give doctors the power to personalize patient care.
