Third Printing of “Big Brother in the Exam Room”!

My eight-time award-winning book, Big Brother in the Exam Room, was just sent for its third printing, this time with the often-requested index. The book discusses the dangers of government-imposed electronic health records, or EHRs, and it includes a revised section on the National Patient ID. I hope that you'll buy it when it comes out.

One data-savvy legislator told me it’s the best history of how the EHR ended up in every exam room, and who pushed to facilitate this data grab of all your most personal information without your consent.

You can add your name to our list so we can notify you when it’s hot off the press. Just go to BigBrotherintheExamRoom.com and sign up. BigBrotherintheExamRoom.com. We’ll let you know when we have it in hand.
