Did Biden Demand to Be Let Loose?

President Biden took Paxlovid, which has led to Covid rebound in some people. Biden's Covid came back three days after he finished the five-day treatment.

Rebound after Paxlovid has been known since May. So, why was the president allowed to leave quarantine? How was President Biden, a fan of lockdowns, mask mandates, and coercive injections, allowed to expose six people to Covid in those three days?

Dr. Bob Wachter, chair of medicine at UC San Francisco, says Paxlovid may not work in younger people or those who are fully vaccinated and boosted – like the president. A doctor at Yale says it may not help anyone who's gotten the shot. So, did Biden demand to be let loose or did his staff never tell him he could still be infectious?

“Of Course Biden Has Rebound Covid,” Rachel Gutman-Wei, The Atlantic, July 30, 2022: <https://bit.ly/3A6g5fQ>

“White House identifies six close contacts of Biden’s rebound case of COVID-19,” Brett Samuels, THE HILL, August 1, 2022: <https://bit.ly/3zCTp5v>
