Should You Try Hyperbaric Oxygen for Covid?

Have you considered hyperbaric oxygen treatment for Covid? Beware of the places that offer this service but have no physicians determining the best pressure or the best oxygen level for you. A doctor in New Orleans said he starts with compressed air and no oxygen for Covid patients because “mainly it’s the pressure and not the oxygen that’s decreasing inflammation.”

A doctor in Iowa shared the story of an 85-year-old woman with Covid who developed severe brain fog and was institutionalized. But after 40 hyperbaric treatments she was discharged from the dementia recovery unit and now plays golf.
