Tenth Amendment Can Stop W.H.O. Regulations

The Left wants to put America under global control through the World Health Organization’s International Health Regulations. Using the “pandemic act” within the Defense Act of 2023, Democrat leadership in Congress did their part.

But ultimately, state governors can refuse unconstitutional demands of Congress. As happened in Florida, states can refuse to follow federal or international demands during a pandemic. And sheriffs can refuse to enforce a governor’s unconstitutional dictates.

Elections determine how much power outsiders get over your state and your country. Notably, the pandemic act within the Defense Act ends in September 2027 – unless Congress renews it. So, vote with that in mind in 2024.
