Only Organization in America Dedicated to Patient Freedom

Do you want government in charge of health care? Do you want government powers, mandates, and restrictions to be a part of your future forever? Do you want your baby’s DNA collected and used without your consent? Do you want a national health surveillance system that lets government profile you and limit your access to care.

If you want patient and doctor freedom, you have an opportunity to support the only organization in America fully dedicated to making it happen, and it’s in Minnesota. On Thursday, September 15, the Citizens’ Council for Health Freedom is holding its 2022 Fundraising Dinner in Oakdale, featuring the courageous and awe-inspiring General Michael T. Flynn.
