**Will Doctors Be Sued for Failure to Treat?**

The CDC now says the vaxxed and the unvaxxed should be treated the same. The hundreds of thousands of people harmed by forced injection or termination may want justice. Lawyers are taking notice. On Twitter, attorney Ben Carlisle, said he’s opening his own law firm to focus on workers who were injured by employer mandated vaccines.

Employers are about to be sued. Will patients also sue doctors? Most Long Covid patients are sick because the medical profession failed to give early treatment. These patients may want justice too. This means wise doctors should begin to recognize and properly treat Covid and long Covid. There should be no more failure to treat. To find a doctor not under corporate control, go to JointheWedge.com
