Seven Facts About the COVID-19 Vaccine

Here are seven facts to consider before getting vaccinated. First, the vaccine is not a vaccine. It will not stop Covid-19 but it may reduce symptoms if you get the illness. Second, it’s never been approved by the FDA. It’s an experimental drug. Third, because it’s experimental no one can mandate that you take it. Some have already sued employers who fired them when they refused.

Fourth, no one knows whether the vaccinated will be able to spread the disease if they get infected. Fifth, no one knows the long-term effects of this unapproved drug. Sixth, according to Dr. Fauci in testimony to the U.S. Senate in May 2020, it could backfire, making the virus more virulent if you’ve gotten the vaccine. Seventh, most people are fine, but deaths and severe reactions have occurred. Make an informed choice.

“Fauci tells Congress: ‘There’s no guarantee that the vaccine is actually going to be effective,’” Lauren Feiner and Berkeley Lovelace Jr. CNBC, May 12, 2020: https://www.cnbc.com/2020/05/12/fauci-tells-congress-no-guarantee-the-coronavirus-vaccine-will-be-effective.html
