Health Freedom Minute

April 25, 2019

National “Protect Baby DNA” Day

Today is National DNA Day, as designated by Congress in 2003, the same year our organization, Citizens' Council for Health Freedom, discovered state storage of newborn DNA without the knowledge or consent of parents. We've been working to stop government storage, sharing and use of newborn DNA ever since.

So I'm calling today National “Protect Baby DNA” Day. The baby's DNA is collected and sent to the government for newborn genetic testing. Some states, like Michigan, keep it forever. Now there's a move afoot to sequence children at birth, depriving them of their genetic privacy rights. Help us stop this. Go to itsmydna.org. www.ItsMyDNA.org

“**House Resolution Designating National DNA Day,**” 108th Congress, 1st Session, H.Con. Res. 110 (posted by the National Human Genome Research Institute), March 24, 2003: <https://www.genome.gov/11008129/house-resolution-designating-national-dna-day/>

“**The Future of Newborn Screening: Why and How Partnerships Will Be Needed for Success,**” Donald B. Bailey Jr., PhD and Scott J. Zimmerman, DrPH, MPH, HCLD, North Carolina Medical Journal (NCMJ), January-February 2019: <http://www.ncmedicaljournal.com/content/80/1/28.full>

Presented daily by Twila Brase, President, Citizens' Council for Health Freedom.

*The Health Freedom Minute is now heard in 47 states:
Mornings M-Th at AM1280 (The Patriot) in MN and 91.5 AM WHKC (FreedomFM) in OH,
afternoons on American Family Radio, and daily on the CSN network
and Bott Radio Network.*
