Facts about Certificates of Immunity for COVID-19

Dr. Fauci of the White House task force suggested digital certificates of immunity to COVID-19 “might have some merit in certain circumstances.” Bill Gates said, and I quote, “Eventually we will have some digital certificates to show who has recovered or been tested recently or when we have a vaccine, who has received it.”

If you’ve been listening over the past three days, you know this is either misinformed or purposeful obfuscation. First, nothing says those who’ve recovered can’t get re-infected, as the World Health Organization cautions. Second, testing tells you nothing except your status at the moment you’re tested. An hour later you could become infected. And getting vaccinated doesn’t mean the vaccine worked. So digital certificates of immunity would be meaningless, to say nothing of unconstitutional.
