Help Us Stop a National Patient ID

Last week my book was available in Washington D.C. for all librarians to look through at the American Library Association conference.

Please get a copy of “Big Brother in the Exam Room: The Dangerous Truth About Electronic Health Records.” It discusses the dangers of the National Patient ID that has been banned from development for 20 years because it’s a federal patient-tracking card and without it you wouldn’t be able to get care.

Get informed now because the U.S. House just voted to fund it, develop it and issue it to all Americans. We’re asking President Trump to veto the bill if it gets to his desk. Buy the book at BigBrotherintheExamRoom.com. Help us stop this Big Brother ID.
