The Wrong Solution for “Surprise Medical Bills”

Congress wants to stop “surprise medical bills.” They plan to force doctors who’ve not signed health plan contracts to accept the same payment as doctors who’ve signed contracts. Health plans love it because it makes every doctor a “network doctor.”

But imagine if Congress told you what you could charge for your services. Expect doctors to quit. Price controls are unconstitutional and lead to shortages.

Tell Senator Mitch McConnell, your Senator, and President Trump to stop the “Lower Health Care Costs” bill. Congress caused surprise bills by creating health plans, which use networks to limit access to care. Tell Congress to bring back go-anywhere, see-anyone real insurance.
