July 20, 2020

**Figure Out Fact from Fiction**

For 130 days, our country has been under an emergency declaration due to COVID-19. From stay-at-home orders to cancelled graduation ceremonies to the shutdown of national parks, to closed businesses, lost jobs and limited access to medical care, we’ve been in a world of hurt. Meanwhile, some states and countries refused to shut down their economy, their industry or their way of life.

Yes, people have died, but nowhere near the number of people who were first predicted to die. At this point, most people don’t know what to think or who to believe. That’s why we’re doing Facebook live videos every week to share key information you can use to figure out fact from fiction. Right now, the biggest fiction is all about masks. See our Covid Update Video #20 at the CCHFreedom Facebook page.
