Will You Agree to Wear Goggles?

Dr. Fauci, of the White House Covid-19 Task Force, now suggests we wear goggles, not just masks. We're six months into this pandemic and this is the first time we hear this? What is going on? Federal officials know viruses can enter through the eyes. They've often mentioned not to touch your eyes. Hospital workers protect their eyes from infectious diseases. I even mentioned the eyes as an entry portal in one of our Covid Update videos on Facebook.

Will this work like masks? First, they suggest them, then they mandate them—even though there's no evidence that they work and experts worry that masks may cause more people to infect themselves with the virus. So, will you wear goggles if they tell you to wear goggles? Now is the time to think about it.
