CCHF Launches Patient Toolbox

Today, our organization, Citizens’ Council for Health Freedom, has launched Patient Toolbox. Find it at PatientToolbox.org.

Patient Toolbox gives patients and families 24/7 assistance in the exam room, the hospital room, and at home preparing to go to the doctor. Included at PatientToolbox.org is information to help you when you face coercive consent forms, questionnaires, demands that you comply with treatments, and more. For example, we help you figure out the credentials of whomever is taking care of you, and help you decide how to respond to tests and treatments hospitals want to perform on your newborn baby.

PatientToolbox will expand as we hear from patients. Go to PatientToolbox.org. Let us know what you think!
