October 10, 2011

Feds to Require Risk Scores on Citizens

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

The feds have issued a proposal to grab your medical records. Shockingly, they also want to require States to use the data to create individualized “risk scores” on citizens. This is government profiling on steroids.

The data grab is deep in a proposed federal rule. An insurer notified Congressman Tim Huelskamp, a Republican from Kansas. His commentary alerting the public got published. I read it and put out an email alert…and wrote comments opposing the plan.

If you don’t get our email, you’re still in luck. The deadline for public comments has been extended until October 31. Rep. Huelskamp is gathering signatures from Congress to tell the federal agency to jettison the rule. Call your member of Congress and go online to oppose the rule. Go to healthfreedomminute.net and look for the bright blue box. That’s healthfreedomminute.net.

*The Health Freedom Minute is heard on 159 stations in 37 states, including afternoons on American Family Radio.*
