Asthma Inhalers to be Banned

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

The FDA is planning to ban all over-the-counter inhalers used by people with mild asthma. On January 1st, only “green” inhalers will be allowed. Aerosol inhalers that actually force the medication into your lungs will be prohibited.

This also means the cost of an inhaler will go from $20 today to up to $60 for a prescription inhaler…plus the cost of a doctor’s visit. Health care will be more expensive for millions of people—and inhalers less effective.

The plan is part of an international agreement to protect the ozone layer. What about patients? This is serious. People with asthma have difficulty breathing. The EPA and the FDA do not care. If these agencies are not stopped, patient care will be sacrificed on the altar of environmentalism. Call Congress.
