New Research Plan

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

You have until midnight on Wednesday to tell the government that your medical records and your DNA are yours. The federal Food and Drug Administration is asking for comments on their plan to change research regulations.

Proposed changes include letting government and insurers study your medical records without your consent to micromanage your doctor and interfere with your care. And if you’ve left any blood, DNA, body parts, or data behind at the hospital or clinic, the FDA proposes to let them be used for research without your consent. Go to healthfreedomminute.net today to find out how to comment.

And don’t forget to sign up for our November 10 fundraising event with attorney Jonathan Emord. He’s leading the charge against Obamacare with a case headed to the Supreme Court. Sign up at healthfreedomminute.net. That’s healthfreedomminute.net. I look forward to seeing you there!
