Call NOW to Stop National Patient ID!

Thank you for donating to CCHF!! We appreciate every dollar you gave during the Give-to-the-Max campaign.

Now I need you to quickly engage. Have you called your U.S. Senator? The decision to ban or impose a National Patient-Tracking Number will happen soon. This number will be the only way you can access care. It’s a constitutional violation of your privacy rights. It will create a national database of everyone’s medical records.

It’ll make your private medical history easily accessible to 2.2 million entities (plus government agencies) without your consent. Please call your U.S. Senator. Tell them to stop the National Patient-Tracking Number. Stop the National Patient ID.
