FDA Says Don’t Trust Cloth Masks

Dr. Fauci says it “makes common sense” to wear more than one layer of mask, since variants of the virus have emerged.

Let’s remember what Dr. Fauci once said: “When you’re in the middle of an outbreak, wearing a mask might make people feel a little better, and it might even block a droplet, but it’s not providing the perfect protection that people think that it is.” In fact, masks were never made to protect against viruses.

Furthermore, the FDA says makers of non-medical (cloth) masks are not allowed to claim that their product is “safe or effective for the prevention or treatment of patients during the COVID-19 pandemic.” And what about breathing difficulties and the dangers of self-contamination? Two masks will only make these worse. Masks don’t work. Let’s not wear two of them.

FDA Letter to Manufacturers of Face Masks; Health Care Personnel; Hospital Purchasing Departments and Distributors; and Any Other Stakeholders.” U.S. Food& Drug Administration, April 24 2020: https://bit.ly/2Yxef3T
