## **Personalized Care Act Promises Freedom**

Would you like to use your own money tax-free to buy care and coverage? The Personalized Care Act, S. 3112, sponsored by Republican Senator Ted Cruz and H.R. 5596 sponsored by Republican Congressman Chip Roy, would provide expanded Health Savings Accounts to Americans.

You'd be able to have a health savings account even if you didn't have health insurance. The money could be used to pay for medical care, over the counter prescriptions, and insurance premiums. Health sharing members could use it to pay their monthly health share. People on Medicare or Medicaid could use the funds for care or costs not covered by the program. You could also contribute about three times more than what you can contribute today.

Tell your member of Congress to sign on to the Personalized Care Act.
