Where to Get Early Treatment Drugs for COVID-19

During the COVID-19 crackdown, I have often said that the ban on FDA-approved drugs, often found over-the-counter in third-world countries, will be one of the greatest travesties of the pandemic.

These medications can keep you out of the hospital and off the ventilator, so where should you go? One national physician group created an extensive guide to home-based COVID treatment. Find it at **AAPSONline.org**. Another group of doctors launched **speakwithanMD.com**. Just pay \$90 for a consultation with a physician who will help you get early, life-saving treatment. Again, AAPSONline.org and speakwithanMD.com.

“MDH lab testing confirms nation’s first known COVID-19 case associated with Brazil P.1 variant,” Minnesota Department of Health, January 25, 2021: <https://bit.ly/3cuyzeq>
