Health Freedom Minute

April 1, 2015

Why Do Republicans Want Our Data Online?

Why do Republicans want everyone's medical records online? This is not an April Fool's joke. Congressman Mike Burgess has a bill to require every electronic health record company to connect with every other EHR company making everyone's data accessible to countless outsiders because HIPAA grants broad access without patient consent. This bill is dangerous to privacy and health freedom.

A national medical records system is the foundation of a national health care system. HillaryCare required it and Obama mandated electronic health records to facilitate Obamacare's data-centric controls. This is not rocket science. He who holds the data makes the rules. What are Republicans thinking?
