Coercion not Consent

Welcome to the Health Freedom Minute. This is Twila Brase, president of Citizens’ Council for Health Freedom.

Have you been to the doctor lately? I’ve been hearing more and more stories from concerned people who have. Especially regarding the consent forms they are being asked to sign.

The consent forms now include consent for research, consent to share data broadly, consent to be part of the state health information exchange and more. Lots of consent sections beyond treatment and payment but only one signature.

This might be fine if there were an option to say no. But if patients refuse by crossing out some of these sections, some clinics are now refusing to provide care.

This is not consent. This is coercion to receive care. Call me or send me your stories and a copy of the forms you’re being asked to sign. Contact me through the feedback option at healthfreedomminute.net. That’s healthfreedomminute.net.
