Wedge Practice Opens in Hawaii

Welcome to Wedge of Freedom Wednesday. A practice in Hawaii, called Island Heart and Vascular, just joined The Wedge. Cardiologist Lawrence Derbes specializes in pacemakers, stents and more. His prices are online. For example, patients will pay him $525 to place a pacemaker. Hospital costs are extra.

While most of you will never have a reason to visit this practice, unless you’re on vacation in Hawaii, the fact that a specialist can set up a clinic without the costly overhead and outside controls of government and managed care demonstrates how switching to direct payment and direct relationships means more affordable care. Isn’t it time to go direct? Go to JointheWedge.com.
