Why Your Doctor's Not Looking At You

Do you wonder why your doctor’s looking at a computer screen and not you? Blame the Obama administration and the Democrat Congress who passed the HITECH Act less than a month after Obama’s inauguration.

The Health Information Technology for Economic and Clinical Health Act of 2009 mandated the purchase and use of electronic health records (called EHRs) for doctors and hospitals -- or they would be penalized with lower Medicare payments. These computerized records are the foundation of Obama’s initiative to nationalize health care. They are the tool government and health plans are using to control doctors. Republicans made the EHR mandate even worse in 2015. Tell Congress to repeal the EHR mandate.
