**Three Question Survey on Access to Medical Records**

This is a survey. Question #1: Do you want access to all the data in your medical records? Question #2: Do you want your doctor and hospital to share your entire medical record with researchers, government and corporations without your consent? Question #3: Do you want to limit what records your doctors and hospitals see, or do you want them to access your lifetime of x-rays, laboratory tests, diagnoses, medications and every word ever written about you?

Amazon, Google and Microsoft are committed to removing barriers to your medical data, but under HIPAA, you won’t control who sees it. To comment on my three questions, click the GREEN “Give Feedback” button under the microphone on cchfreedom.org. That’s cchfreedom.org
