November 23, 2012

Here a Breach There a Breach Everywhere a Breach

A national medical records system is being built. Bush issued an executive order. Obama provided $34 billion. Because of HIPAA, your medical records can be put online and into vast linked computer systems without your consent. What is the result?

The records of more than 19 million people have already been breached. Each incident costs about $5.5 million. And 2.2 million entities have access to your data without your consent. This access will be easy once the national data system is complete. Experts say breaches are impossible to stop, but I’d settle for stopping the 2.2 million entities who currently have legal access to my records.

“The organizational cost of a data breach fell from $7.2 million in 2010 to $5.5 million in 2011.” REPORT ON PATIENT PRIVACY, AISHealth, Vol 12, Issue 4, April 2012.

“Proposed Changes to Privacy Rule Won’t Ensure Privacy,” Health Freedom Watch, Institute for Health Freedom, September 2010.

Presented daily by Twila Brase, President, Citizens’ Council for Health Freedom.

The Health Freedom Minute is now heard in 37 states: Mornings M-Th at AM1280 (The Patriot) in MN and 91.5 AM WHKC (FreedomFM) in OH, afternoons on American Family Radio, and daily on the Bott Radio Network.
