**Telling Quotes from GruberGate**

Jonathan Gruber is the MIT economics guru that the White House paid nearly $400,000 to craft Obamacare. At least 7 videos have been found in which he talks about how the American people were purposefully deceived to limit opposition to the bill. In several he mentions the “stupidity” of the American voter.

President Obama claims he doesn’t know him. Video clips of the president extolling Mr. Gruber’s expertise say otherwise. I have tweeted 28 telling quotes from Mr. Gruber. In one he says he glad he’s not a politician because he can say anything. As a result, there’s now GruberGate and a new verb: grubering. Go to @twilabrase on Twitter and check them out.
