Should You Support Paul Ryan's Plan

With Republicans in charge, people are looking at Speaker Paul Ryan’s “A Better Way” health care proposal, which has five principles including repealing Obamacare, expanding choices, protecting the vulnerable and preserving Medicare.

The principles may sound good, but there are problems. For example, the plan supports Medicare Advantage, the HMO plans that can legally limit access to care. Also, Medicare has a $43 trillion unfunded liability and to cut costs, Congress is increasingly allowing government interference in medical decisions. The Ryan plan supports mandated reporting by doctors to the government and paying doctors for value, as defined by bureaucrats, not actual services. If you support freedom, this should sound alarms.
