Losers that Shouldn't Lose

Republicans are so afraid of people being upset, some don’t want to repeal Obamacare. But here’s the reality. There are always winners and losers when Congress acts. But Obamacare created losers that shouldn’t lose and winners that wouldn’t naturally win. Bill Clinton called it a “crazy system” where 25 million got health care but those working 60 hours a week “wind up with their premiums doubled and their coverage cut in half.” He’s right and Obamacare’s wrong.

It is not the responsibility of government to guarantee health insurance. That’s the liberal argument and it leads to national health care. Tell Congress you want full repeal and you want it now. Or it may never happen.
