Have You Been Forced Into Medicaid?

Don’t play around with Obamacare. The exchanges are enrolling people into Medicaid against their will. Here’s how it works. You go online just to see what you’re eligible for. And despite the fact that the entire system is not secure and your identity could be stolen or your computer hacked you enter all your personal data into it.

Suddenly, you receive a message that you’ve been found eligible for and enrolled in Medicaid. One Wall Street Journal writer said that’s what happened to her mother. There was no cancel or opt-out button. She was stuck. If you’ve been forced into Medicaid, let us know. Go to CCHFreedom.org and click the feedback button. CCHFREEDOM.org
