Interest in Wedge of Freedom Grows

Last week I was in Orlando giving two presentations to physicians on The Wedge of Health Freedom. One specialist who has opted out of Medicare wanted to join The Wedge but still needs to drop her insurance contracts. Another wanted to have both a Wedge practice and a non-Wedge practice, but I had to say no.

The federal government has certain controls over doctors that participate in Medicare. Every doctor has a single National Provider Identification number. Until they opt out of Medicare, that number follows them everywhere giving the government access to the medical records of every patient under their care. Ask YOUR doctor to join the Wedge.
