Risky Business

Did you know that employer-sponsored coverage is risky for you? First, your choice of doctors and coverage may be limited. Most employers offer you one plan. Second, you risk getting a pre-existing condition while on the job and not being able to change jobs. Third, if sickness forces you to leave your job, you may lose your insurance. This is the cause of many medical bankruptcies.

Fourth, your paycheck is smaller because your employer is paying part of your wages to the insurer. He’s also probably paying more to the insurer than you’d be willing to pay. You’d go shopping if you paid on your own. For your own protection, consider buying a private policy even if your employer will not increase your wages.
