**Obamacare 2.0 Won't Work**

Why did Republicans think that they must replace Obamacare? Americans asked for repeal, not replace. And why did the House GOP leadership not regularly consult with conservatives before releasing a bill that would replace Obamacare with Obamacare 2.0.? The Freedom Caucus, conservative Senators and a host of conservative groups opposed it once it became public.

The GOP bill replaces one federal program with another federal program. When Americans figure out that the American Health Care Act is just the Republican version of Obamacare, and that there’s no guarantee of lower premiums or improved access or wider networks, what will that mean for the next election?
