**Oppose Medicare Drug Rationing Plan**

Medicare proposes a five-year Obamacare experiment on Medicare patients. Conducted without consent, this is one of 67 announced, ongoing or developing experiments. The government calls them “Innovation Models” – a euphemism for government research.

The Obama administration proposes to reduce payment for most Medicare Part B drugs in selected regions of the country. They will force all area doctors, hospital outpatient clinics and suppliers to participate (p. 86). They expect the payment cuts to change physician treatment decisions. Expect rationing of care. You should oppose this plan by the May 9th deadline. Information to do so is in the written form of this radio Minute on our website.

The proposed rule: Medicare Part B Drug Payment Model (CMS-1670-P) [http://www.regulations.gov/#!documentDetail;D=CMS-2016-0036-0002](http://www.regulations.gov/#!documentDetail;D=CMS-2016-0036-0002)
