Feds Move to Pay Doctors to Obey

Federal officials want your doctor working for them. Six weeks ago, they made what they called a “historic announcement.” They set a timeline for shifting Medicare payments “from volume to value.” They plan to pay doctors only according to the “value” government attributes to the services. They will not pay doctors for actual services. Imagine paying your plumber this way.

Ninety percent (90%) of payments will be tied to “value” by 2018. This payment change will not only endanger patients, it will endanger the very practice of ethical medicine. Only doctors willing to obey the dictates of outsiders, including rationing directives, will choose the profession. That’s the wrong kind of doctor for patients.
