Health Freedom Minute

March 8, 2013

Exchanges - Insurance Agents No More

Today's marketplace includes 500,000 health insurance agents. They help people choose health insurance. But President Obama is willing to force them out of a job. Obamacare creates "navigators" to help people find coverage in the government exchanges. Navigators are not agents. They are organizations and government agencies.

Obama's exchanges will use government grants to pay navigators. The feds have ruled that insurance agents can become navigators if state legislatures allow it. But if so, they become government workers. The Exchange is not a marketplace. It's big government. Go to NOTaMarketplace.com to learn more. If you want one of our billboards in your state, let me know.
