Feds Want More Money for “Exchange”

Yesterday I said there’s just one national Obamacare exchange with 50 state portals. See our diagram online. If states refuse to build a state exchange, a state portal, the feds threaten a federal exchange. Nonsense. The federal exchange is just a federal portal, a website. The Fed’s plan is a reach into each state through a state portal, and if necessary a single federal portal. The goal is national control through a national exchange.

The Feds just extended deadlines for exchange grants to resistant states. The Feds also just asked for nearly a billion dollars more to build the federal portal. They’ve already spent their first billion. Just say no.
