Left Complains of Obamacare Incompetence

It is fun to hear the Left chastising Obama. Joe Klein in *Time* magazine takes the president to task big time. He says small businesses supported Obamacare because employees would be able to shop for the best deals in the Exchanges. He says the Administration has had three years but failed to set them up. Instead workers will get their employer’s choice for at least a year.

Joe sees “weekly examples of this Administration’s inability to govern.” Joe doesn’t think Obama has a vested interest in the programs actually working. He calls on Obama to start paying attention to the details of implementation or put all Democrats at risk of losing power. Great read.
