Big Trouble Obama Brain Mapping

Obama wants to map the brain, and give the project $100 million the first year. But a British newspaper says the project “is hardly the next Human Genome,” and reports $3 billion could be thrown at it the next 10 years despite having no plan, time frame or goals.

The goal could be controversial. The Heartland Collaborative envisions students receiving individual education programs based on brain imaging and genetic predictors. And as part of the controversial Common Core curriculum, the U.S. Department of Education supports functional Magnetic Resonance Imaging, which detects changes in blood flow in the brain. We don’t need the government digging this far into who we or our children are.

“What information is being collected on your kids through Common Core? The Blaze, March 27, 2013.

Presented daily by Twila Brase, President, Citizens’ Council for Health Freedom.

The Health Freedom Minute is now heard in 37 states: Mornings M-Th at AM1280 (The Patriot) in MN and 91.5 AM WHKC (FreedomFM) in OH, afternoons on American Family Radio, and daily on the Bott Radio Network.
